CONTENTS

No. 1 JUNE, 1924

ROBERT H. BOWEN. On the acrosome of the animal sperm. Two figures 1

F. E. CHIDESTER. The anatomy of an otocephalic dog. Eight figures 15

JOSEPH M. THURINGER. Regeneration of stratified squamous epithelium. Two plates (eight figures) 31

R. BENNETT BEAN. The pulse of growth in man. A preliminary report. Six charts... 45

F. H. SWETT. Exceptions to Bateson's rules of minor symmetry. Fifteen figures..... 63

SAMUEL WOOD CHASE. The absence of supplementary prisms in human enamel. Two figures 79

T. H. BAST. A note on the phagocytic activity of bone cells. One figure 91

ALFRED SHERWOOD ROMER. The lesser trochanter of the mammalian femur. Three figures 95

J. KNOX GIBSON. A perforated septum pellucidum. One figure 103

No. 2 JULY, 1924

W. H. MCGAW. A stage in the development of the serous cavities. Eleven figures..... 105

G. E. COGHILL AND JULIA MOORE. The vascular system in relation to neuromuscular functions in the early development of Amblystoma. Thirteen figures..... 131

F. W. CARPENTER. A note on the connections, in the mammalian myenteric plexus, between the enteric neurones and extrinsic nerve fibers..... 149

A. E. HOPKINS. The appearance of Nissl substance in nerve cells following variations in fixation 157

R. BENNETT BEAN AND CALVIN T. BURTON. Notes on the index of the foot among young white men. One chart 165

WILDER G. PENFIELD. The cranial subdural space. (A method of study)..... 173

No. 3 AUGUST, 1924

J. A. BADERTSCHER. Results following the extirpation of the pineal gland in newly hatched chicks 177

J. A. LONG. Rat cages of simplified construction 199

R. R. HUMPHREY. A case of cyclopia in Homo..... 207

No. 4 SEPTEMBER, 1924

H. B. Eisberg. Intestinal arteries. Fifty-six figures 227

J. Parsons Schaeffer. Some points in the regional anatomy of the optic pathway, with especial reference to tumors of the hypophysis cerebri and resulting ocular changes. Seventeen figures 243

J. C. Sandison. A new method for the microscopic study of living growing tissues by the introduction of a transparent chamber in the rabbit's ear 281

Harry D. Kruse. A case of bone formation in the medulla of the suprarenal gland. Two figures 289

A. L. Salazar. Sur l'existence de blocs tannophiles géants, dans la cellule lutéinique de la lapine. One plate (nineteen figures) 295

A. L. Salazar. La coloration nucléaire et de fond dans les coupes traitées par le tannin-fer 305

A. Portella. Les vaisseaux et les lacs sanguins dans l'hypophyse humaine (lobe glandulaire). Three figures 309

A. Portella. Le lobe antérieur de l'hypophyse du foetus à terme. One figure..... 313

No. 5 OCTOBER, 1924

J. S. Nicholas. The development of the balancer in Amblystoma tigrinum. Two plates (fourteen figures) 317

Elroy F. Sheldon. The so-called hibernating gland in mammals: a form of adipose tissue. Two plates (twelve figures) 331

Luther S. West. Observations on the lymphatic nodule, particularly with reference to histological changes encountered in senescence 349

Robert T. Hance.. Filing microscopic slides in a card catalogue. Three figures 367

Henry J. Fry. Cell dissection by hand. Two figures 371

V. J. Bushkovitch. On the question of pneumatic cavities of the temporal bone. Two figures 379

J. S. Huxley and P. D. F. Murray. A note on the reactions of chick chorio-allantois to grafting. One plate (four figures) 385

Edith Pinney. An abnormal relation of the iliac artery to the sciatic plexus in the frog. One figure 391

Harold D. Clayberg. Book review. Anatomie générale et topographique 393
